- React Advanced (Meta certificate)
- Version Control (Meta certificate)
- Graphic Designer Diplome (MJM Graphic Design School)

Professional Profile

Passionate about the web and programming since my adolescence, I quickly learned to program on my own and later validated my skills through certifications.

Comfortable both in Front-End and Back-End, I master several web languages (PHP, JavaScript, jQuery, React, HTML, CSS, Python) in their various forms (object-oriented, MVC model) and regularly update myself with the latest developments.

With over 15 years of web development experience, I have encountered a wide range of functions, issues, and solutions. I also have a background as a web graphic designer.

Demonstrated ability to collaborate effectively with clients and team members to deliver quality solutions.

Professional Experiences

Freelance projects

As a freelance, I have worked on many projects, small projects, and bigger projects. Mostly Remote

"Awakening Iztaccíhuatl" Pitch desk WebApp
